EXIT READER MODULE

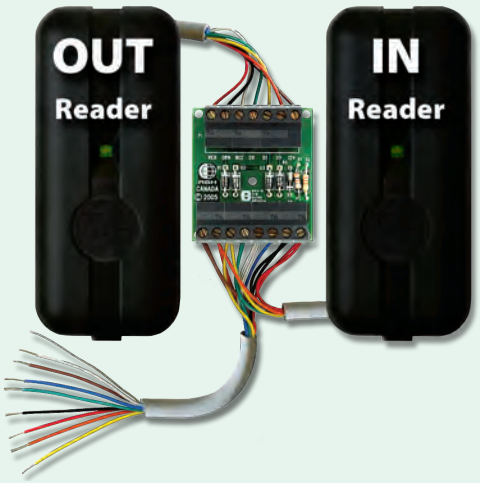

EXITRDR

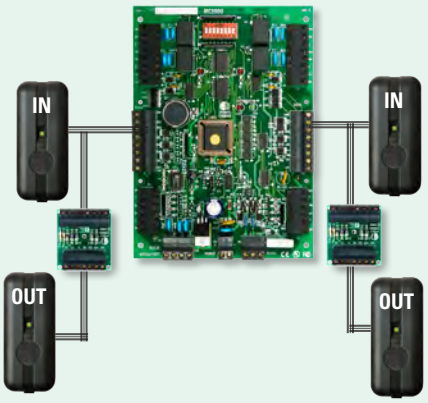

Our EXITRDR Exit reader module is a flexible, convenient and inexpensive way to control and track cardholder access in both directions through the same door.
The EXITRDR module is compatible with panels in AxiomLite™ and Integra32™ product lines and does not reduce maximum wiring distance between the reader and controller.
A single cable is required to connect both readers, reducing cost and making it possible to use existing wiring to add in/out tracking capability to existing doors.
The Module conveniently fits inside a standard single gang electrical
box and is a neat way to terminate reader wiring. Removable connectors will make an unlikely replacement of this module a snap!

Specifications:

Compatibility :	IRC-2000 Family of controllers URC-2000 Family of controllers
Power Consumption :	30mA @ 12VDC
Dimensions:	51mm (2") 46 mm (1 13/16") 20mm (13/16")

Features:

- Door In/Out control & tracking
- Low cost full Anti- passback
- One cable - two readers!
- Compact, robust design
- Same reader wiring range
- Low power consumption
- LOW COST!
